Smutty Fun Volume Four: Five Explicit Erotica Stories

The human brain is remarkably similar to the brains of non-human primates and lower mammals at the molecular and cellular levels, suggesting that the human brain deploys evolutionarily generic signaling mechanisms to store and retrieve large amounts of information and, most remarkably, to integrate information in ways that result in the generation of new emergent properties such as complex languages, imagination, and invention.

Against the Heathen

It was a stimulating time in which to write, with a wealth of unused material at hand. Money Mustache January 5,pm.
